There is a file for each of the main clauses in the standard.		Tab 7	How We Meet ISO Requirements (forms that list the ISO clause numbers) Auditors use these forms during the Auditor Training course when the requirements of the standard are reviewed. The written explanation for the clause is reviewed. Then the Trainer has the trainees review the organization's top-level document that explains how the organization meets the ISO clause requirements. The forms are used by Auditors to 1) identify the organization's document that tells how ISO requirements are met, and 2) to write a note that tells the method that is used to meet the clause requirements. The Trainer provides this information.	8

			<p>Pareto Analysis - Trainer Manual A system for implementing Pareto Analysis is included in this product because this method can bring the greatest amount of improvement (and cost savings) in the shortest amount of time when you have situations where this type of analysis can be used.</p>	
Tab 10- pareto analysis.xls	Training	Tab 10	<p>Pareto Analysis <i>(Index of Files)</i> Pareto Analysis is used to determine what should be fixed first to get the greatest improvement when you have a large number of nonconformities to analyze. Activities that could generate a large number of nonconformities include customer complaints, incoming materials inspection, product inspection and test results, product returns, warranty repairs and nonconforming materials review. The files in this section include Pareto Analysis training for data entry personnel, the analyst, and top management. This training is self-training and takes very little time to accomplish. These materials were developed to deliver factual data to top management and are structured so the analyst is not doing all of the work. Top management determines if and when this type of analysis will be used.</p>	2
